Objective

The Organizing Committee invites you to the National Seminar on "Himalayan Devastation and Eco-Balancing" on August 31st, 2013 at the Department of Botany, University of Lucknow, Lucknow. There will be invited lectures delivered by the Professors/Scientists of eminence in their field and a poster session. The objective of this seminar is to provide a platform for interaction among various Professors, Scientists and Students associated with current burning issues of ecological disbalance including the flora, fauna and geological components.

About the Department of Botany

Established in 1921, the Department of Botany at Lucknow University has emerged as a comprehensive centre of teaching and research. Late Prof. Birbal Sahni, Founder Head of the Department, and his learned colleagues, through their dedication and vision brought global fame to this Department. An outcome of this strong foundation was the emergence of powerful research groups in Plant Nutrition, Cytogenetics, Plant Virology, Bryology, Phycology, Mycology, Plant Pathology, and the Department continues to flourish and garner national and international acclaim through its scientific pursuits. Its alumni are placed in positions of repute, both in India and abroad.

On account of its continued scientific endeavours, this Department was selected by the Department of Science and Technology under its FIST, DST-PURSE programme and by the UGC for its Special Assistance Programme (SAP) etc. The Department of Botany has earned great respect over recent years and promises to provide numerous interesting and lucrative career opportunities to its students in the years to come.

At present, other than a regular post-graduate programme in Botany, the Department harbours three more post-graduate programmes namely Plant Science, Environmental Science and Microbiology. The Department is recognized for its Ph.D. programmes in Botany and Environmental Science.

Your complimentary use period has ended. Thank you for using PDF Complete.
