## INTRODUCTION

Resource management comprises the acquisition and deployment of the internal and external resources required to deliver the project, programme or portfolio. Resource management is the aspect of project planning that focuses on the supplies used to produce a deliverable. It is essential process for managing various resources effectively to achieve project goals and objectives within the time and budget constraints. It is a broad category of management as opposed to discipline as such for planning, leadership and control of resources so that the right resources are assigned to the right tasks.

Monitoring and Evaluation is a process that helps improve performance and achieve results. Its goal is to improve current and future management of outputs, outcomes and impact. It provides a way to assess the causal link between implementers, beneficiaries and decision-makers by providing desired information showcasing project progress thereby contribute to transparency as well as accountability.

Managing resources involves schedules and budgets for people, projects, equipment, and supplies. Organizations have been utilizing Monitoring and Evaluation process to assess the development of projects, the resource management and other activities in administration. NPC training programme would help to understand various approaches to provide greater control over project delivery, optimising project scheduling, balance workloads, and increase productivity. The training programme has been designed to enable participants to contribute effectively within the organization by impacting tools and techniques of systematic collection and analysis of information to track the progress of project implementation against pre-set targets and objectives with a view to control over-allocation of resources across multiple projects.
