

## **SAMVARDHAN**

The third phase of our student support initiatives, 'संवर्धन', a Student Mentor- Student Mentee Programme.

Via this programme, we hope to utilize the university experiences of an older student to transform new students into enthusiastic shareholders of the university.

For achieving this, it is proposed that

- Doctoral students will mentor postgraduate students, while postgraduate students will do the same with undergraduate students.
- This mentoring responsibility will be voluntary in nature.
- The responsibilities of the mentor will be to
  - Help their mentees navigate through the curricular life of the university.
  - Provide subject experience and career guidance to their mentees.
  - Ensure that their mentees are able to fully utilize the resources of the university.
  - Guide their mentees into capable future mentors.
- They will also be expected to timely guide the students towards respective university officials and faculty when the need for higher help arises.

Needless to mention, this activity will strongly benefit their resume, especially in the international scenario. The mentors will also be provided certificates stating their participation.
