

Workshop organized by IQAC Cell

Theme-Opportunities at Department of Atomic Energy Date- 12 March 2016

Resource Person- Prof. Vandana Nanal, TIFR (Tata Institute of Fundamental Research)

This workshop was organized by IQAC University of Lucknow and was held at physics auditorium and about 105 participants were present. Prof. Vandana Nanal insisted that now atomic energy regulatory board ensures regulatory processes and functions and safety requirements to ensure that sources of ionizing radiations are handled, used and transported safely without causing harm to people and environment. Prof Vandana Nanal clarified that objective of this workshop is to improve the perception of public about the safe use of atomic energy and radiation for societies benefits in a peaceful manner so that fear which has been developed in the mindset of people because of propagating myths in the society can be eradicated or eliminated fully.

Prof. Vandana Nanal also emphasized that for a sustainable and overall inclusive growth, India need to harness all available energy sources. She also insisted that India has been able to master the complete nuclear fuel cycle through its indigenous efforts, now India is poised to realize, over the next few decades, the full potential of nuclear power to substantially contribute to meeting the country's growing energy requirements. This workshop was very good and informative as, it was able to clarify doubts of the participants in a very smooth manner.
