

Workshop organized by IQAC Cell

Theme-“Awareness workshop on Indo-US collaboration”

Resource Person: - Prof. Sanjib Mishra, Department of Physics and Astronomy, University of South Carolina

Date- 26 Nov 2016

This workshop for teachers and students was organized by IQAC University of Lucknow and was held at Physics auditorium and about 100 participants were present.

Resource person Prof. Sanjib Mishra highlighted that prime objective of this workshop is to make aware students and teachers of University of Lucknow about possible areas of collaboration between India and USA with respect to innovation, passion and commitment to spread knowledge of astronomy and space sciences.

Prof. Sanjib Mishra insisted that basic idea behind this workshop is to develop scientific temperament in students and teachers so, that intelligent and analytic community can be created.

Prof. Mishra emphasized that by means of Indo-US collaboration concepts of physics and astronomy can be clarified through astronomical tutorials, modules, curriculum specifically designed for the Indian students.

Prof. Mishra also talked about introductory astronomy science and space about astrophysics and telescopes. He also guided students/Teachers of University of Lucknow about possible areas of advance research in physics and astronomy at university of South Carolina.

This workshop was very informative for students/ teachers of University of Lucknow as, it highlights new opportunities to be explored in the area of physics and astronomy.
