Mission Shakti Phase-4

An initiative of Government of Uttar Pradesh

Title: Women's Safety: Modern Day Challenges

In its 4th Phase, the Mission Shakti programme of the Government of Uttar Pradesh was organised at the Department of Geology, University of Lucknow under the patronship of the honourable Vice Chancellor, Prof. A.K. Rai. The event was initiated by Professor Madhurima Lal, convenor of the Mission Shakti program at Lucknow University at the Department of Geology, under the supervision and the kind cooperation of the Head of the Department, Prof. Ajai Mishra. The event was coordinated and conducted by Dr. Purnima Srivastava at the Department of Geology.

This year's theme "Women's Safety: Modern Day Challenges" was apt for the time and with Ms. Shweta Srivastava, ADCP, Police Commissionerate Gombi Nagar, as the chief speaker, the event achieved more than it had aimed. Ms. S. Srivastava interacted very personally with the students, educating them about the "Awareness, Alertness and Initiative" model of preventive safety. She spoke with absolute candour, citing relevant personal examples to evoke motivation and responsibility in the audience.

The second guest speaker, Ms. Kulsum Talha, senior journalist and broadcaster, spoke about the importance of gender sensitization and the

important role of the 3 P's: Parenting, Police and Press. She guided the audience to embrace an educated approach to achieving one's goal.

The third guest speaker, Ms. Sarita Nirjhara, founder, Manthan Foundation and social entrepreneur, highlighted the role of males in providing a safe environment to women for them to unlock their truest potential. She evoked in the audience a sense of awareness by citing current examples and figures of domestic violence, sexual assault etc, during COVID times.

The audience that included about seventy students from the bachelor's program, the master's program, the doctorate and the postdoc program interacted freely with the speakers, asked questions and participated with delight and inquisitiveness. Faculty members from the department of geology as well as other departments were also in attendance.

Such programmes organised in the department prove to be of extreme importance by stirring important and uncomfortable topics of conversation and involving people from all age brackets to provide the comprehensive approach of problem resolving and safety provision. The Mission Shakti program, 2022 in its fourth Phase was thus extremely fruitful.
